

Dwarf Brazil Banana

The Brazilian Dwarf Banana Tree produces huge leaves, which are excellent for providing shade, and do not burn easily from excessive sunlight. The leaves of the Brazilian Dwarf banana tree turn bright yellow during the fall. A clump of Dwarf Brazilian Banana Plants provides a large amount of shade at your home recreational area. The bananas from the Brazilian Banana Dwarf Tree can be eaten fresh or used in other delicious treats, such as banana sundaes and banana splits! The Brazilian Dwarf Banana tree is tough, strong, and cold hardy with good wind resistance.

The Brazilian Dwarf Banana Tree is hardy in zones 8, 9 & 10.
