

Harmony's Red Robin Begonia

Begonia 'Harmony's Red Robin' is an outstanding **small leaved rex begonia cultivar**. The small leaves are metallic red with a black margin and a black center area. It is easy to grow and has a compact growth habit.

Grows to about 8" in height

Place in good light; some direct sunlight is needed.

Accurate watering – Bring plant to a slight wilt between waterings.

Moderate fertilizer once a month. Stop fertilizer in the winter.

Keep humidity above 50% and night temperatures above 60-65°F.

Growth cycle slows and stops for 2-3 months in the winter. Plants can lose some leaves during this resting period. This is normal. Continue normal watering.

Use terra cotta or clay pots.
