

Oxalis Regnellii 'Triangularis

“not a weed”

Not a weed like its obnoxious cousin ..never seen a seed, nor will it impede any gardening deeds...indeed, so continue to read.

Oxalis triangularis 'Atropurpurea' is a charming, easy-to-grow, clump-forming, winter-deciduous oxalis that has deep velvety-purple leaves edged with a wide black border topped by tiny, light pink flowers in spring...extremely cute! Purple shamrock is a dynamite plant to blend into the perennial border or woodland garden. Will grow successfully through Tallahassee's milder winters.

New leaves taste wonderful in spring salad
